

**PROJECT SUMMARY**

Modern was selected to provide a wide-range of single & multi-wide office trailers at the Hanford Nuclear Waste Clean-Up site in Richland, WA for CH2M Hill, a large contractor servicing the Department of Energy. The project involved over 45 buildings that were delivered & installed within restricted areas. Hanford has extremely rigorous safety requirements due to the number, size & scope of on-going projects. The buildings utilize environmentally friendly, energy-saving features: insulated windows, motion sensors for florescent lighting, extensive use of recycled materials, & wall-hung heat-pumps, as well as required upgraded electrical items & steps/ramps that met ADA, OSHA & NPPA 101.

**FEATURES**

- High volume order with a variety of scope
- Strict security guidelines upheld by our site crew with zero warnings/citations
- Durable finishes & reinforced flooring
- Upgraded electrical items
- Use of recyclable materials in production

- 1 Sink Area
- 2 Open Office Area
- 3 Office
