

PROJECT SUMMARY

Pierce County Library System's vision for their newest outlying facility includes approachable warmth and comfort - quality finishes found in custom homes paired with the grace of strong architectural elements. Red Built open trusses and beams give this space strength and, coupled with self dimming light fixtures and extensive use of highly insulated vinyl windows (including skylights), create an ideal environment to use day-lighting to full advantage. High efficiency gas HVAC units with 100% economizers and insulated spiral ducting to create comfort for the readers inside.

The local News Tribune described the building at its opening as "...a single open room, wrapped in glass and bathed in light".

FEATURES

- Storefront glass entry and ceiling
- Suspended "cloud" ceiling areas with wood panels and Red Built open trusses
- Solid core white birch interior doors and custom interior finishes
- Computer bays, "cyber-bar" and flex meeting space
- Thoughtfully conceived and cost-effective details throughout

- 1 Meeting Room
- 2 Main Entry
- 3 Conference Room
- 4 Corridor
- 5 Market Place
- 6 Restroom
- 7 Work Room
- 8 Staff Room
- 9 Server
