

PROJECT SUMMARY

Modern constructed this 4,752 sqft preschool facility for Orchards Elementary School. The permanent structure includes four classrooms, restrooms (one adjoining each classroom, as well as one accessible from the hall), offices, & prep kitchen; set on a concrete stem-wall foundation. Exterior finishes include lap siding, architectural-grade roofing and gutters & downspouts.

The preschool at Orchards Elementary is one of numerous buildings constructed by Modern for Evergreen School District in Vancouver, WA. The district was so pleased with Modern's history of product quality & professional staff that they happily joined the ranks of Modern's many repeat customers. What makes Modern special? Simply put, it's our team. Ask us how.
