

**PROJECT SUMMARY**

Measuring 2,520 sqft, the RV center sales office was installed on a concrete foundation. Customer parking lot runs along one side & the RV sales lot encircles the rest of the structure. The main entry from the parking lot is recessed with an awning above, breaking up the roof line. The exterior of the building is lap-sided & includes galvanized framed windows. The interior has a tape & textured wall finish, suspended acoustical ceiling, lighting with parabolic lenses & high grade carpeting. All site development was coordinated by another contractor while the building was being built in Modern's factory to expedite the building process & adhere to the client's schedule for the sales center opening.

**FEATURES**

- Standing seam metal- angled mansard
- Lap siding
- Double storefront glass doors on three of four sides
- Freeway visibility
- Stem wall foundation
- Completed ahead of schedule

- 1 Office
- 2 Washroom
- 3 Lunchroom
- 4 Storage
- 5 Open Office
