

**PROJECT SUMMARY**

Whether in beautiful Sonoma or Monterey Counties, California has a heritage of world-famous wines and is at the forefront of sustainable farming and the farm-to-fork movement. Modular wine laboratories are providing a much needed (and relocatable) space solution to several Modern customers. Custom technologies create a professional and high tech laboratory for wine testing. Durable finishes and thoughtful industry-centered details ensure that these facilities can be used seven days a week, with high traffic in the lab proper. Utilizing a modular application allows wineries to maintain rigorous testing and sampling schedules with almost no down time and provide long-term service to a growing industry.

**FEATURES**

- Chemically resistant countertops and cabinets
- Multiple testing stations
- High-end stainless steel sinks and commercial dishwashers
- Sloped floor drains with trap seals
- Transportable between fermentation tanks, aging facilities and fields

- 1 Office
- 2 Laboratory
