

MODERN BUILDING SYSTEMS, INC

"The Environmentally Smart Choice..."

Project Summary

Orchards Elementary School

www.mbs-modular.com

This 4,752 square foot preschool facility was constructed for **Orchards Elementary School** in Evergreen School District, in Vancouver, Washington. The structure includes four classrooms, each with built-in tack boards and countertops with sinks; five restrooms, one connected to each classroom, as well as one accessible from the hall; two offices; one kitchen complete with both a stove and a sink; a janitorial room; and a storage room.

The permanent building sits on a concrete stem wall foundation. It is covered in lap siding and has gutters and downspouts, with architectural-grade roofing. The preschool is also furnished with fire extinguishers.

The preschool at **Orchards Elementary** is one of many buildings constructed by **Modern Building Systems** for Evergreen School District. The district was so pleased with **Modern's** quality previous work and professional staff that they joined the ranks as one of **Modern Building Systems'** many repeat customers. Evergreen School District first came to **Modern Building Systems** in search of a quality, affordable, expeditious way to get the buildings they needed to house their students. This specific preschool was built to house a growing school program that needed space to expand.

Make *"The Environmentally Smart Choice..."* today by calling **Modern Building Systems**; we are here to solve your building space needs!

Features:

- **Tight timelines for completion**
- **Furnished with fire extinguishers**
- **Restroom attached to each classroom**
- **Environmentally friendly - less site impact and more efficient use of materials**
