

HOME CHOICE ACADEMY

Vancouver, WA

Home Choice Academy is one of the many facilities Modern has built for Evergreen School District. A special challenge with this 16-module, 13,290 sq ft building was to combine the dual purposes of housing the district's internet academy & part time schooling connection for home schooled students. Each module was crane lifted & set onto a stem wall foundation & then completed with a site built, 4 in 12 pitch roof system. The central heating is supported by a split system that includes pad mounted compressors and attic mounted air handlers. Utilized by 200 students per day, the building has six miles of data cabling installed in classrooms, administrative and office spaces throughout.

PROJECT HIGHLIGHTS

- The building has dimensions of 64'x210'.
- The building area was 13440 square feet.
- The foundation is Post & Beam.
